

// AFRICA'S RESERVE PROTOCOL

Africa's reserve protocol.

The pan-African Web3 protocol indexed on the productive wealth of the continent. Pioneer. Sovereign. First-Holder.

// THESIS · WHY AFRICAN WEB3

Africa holds every advantage to dominate global Web3 — 1.4B inhabitants, 70% mobile-first transactions, \$100B+/year remittances, world's largest free-trade zone (AfCFTA). What it lacks is sovereign infrastructure. MANSSA builds it.

// ECOSYSTEM · FIVE PRIMITIVES

\$MANSSA · Reserve token

Treasury-backed reserve currency. Bonding mechanic — cliff 30 days + vesting 180 days. First-Holder enforced.

DAO · Governance

On-chain governance. Anti-whale 5%, quorum 10%, timelock 48h/168h, Security Council 7 mandataries.

RWA · Real assets

\$aAFRICA Phase 1 (cocoa, coffee, vanilla, cotton — EUDR) · \$gAFRICA Phase 2 (LBMA gold). Institutional tokenization.

LaunchLab · Accelerator

Web3 founders Africa-first. FSRA Cat. 3C licensed. Capital + protocol + network.

KETZAL · HPC compute

Pan-African supercomputer Casablanca (CFC 8.75%). Oracle bicameral HSM + TEE + Chainlink OCR.

// METHODOLOGY · 8 ANTI-ZIG PRINCIPLES

Eight rules. No exceptions.

- 01 · Not money — asset-backed, never a payment rail
- 02 · Issuer ≠ regulator — structural separation
- 03 · Tier-1 audits — Big-Four mandatory
- 04 · 130-150% overcollateralization — on-chain verifiable
- 05 · Physical redemption — right to withdraw underlying
- 06 · Auto-arbitrage — smart-contract stabilization
- 07 · Reserves on-chain — daily updates, public read
- 08 · Infra ≠ issuer — MANSSA never issues, SPVs do

// STACK · L1 ETHEREUM NATIVE

L1 Ethereum native. By choice.

Ethereum mainnet only. Solidity EOF post-Glamsterdam. EIP-7702 + AA native L1 (Hegota). Oracle bicameral (HSM FIPS 140-2 + TEE Intel TDX/AMD SEV-SNP + Chainlink OCR). HPC KETZAL Casablanca integrated.

// USER EXPERIENCE · ZERO-FRICTION

Zero-gas onboarding. Free governance. Pan-African by design.

Paymaster 3-buckets — B-Onboard (First-Holder claim + KYC + SBT) · B-Govern (DAO votes + delegations) · B-Advanced (vesting, staking, bonding, user-paid native AA). Sponsored by Foundation Treasury. Anti-Sybil multilayer.

// ROADMAP · INDICATIVE H1 2027

M1 · Specs v1.0 — Smart contracts · Oracle bicameral · HPC Phase 1

M2 · Audits dual-cabinet — Zero high/critical, two tier-1 firms

M3 · Security Council — 7 independent mandataries constituted

M4 · Oracle live — HSM + TEE + Chainlink OCR production

M5 · Bug bounty — Immunefi tier-1 · disclosure framework

M6 · TGE — indicative H1 2027 · pen test cleared

MANSSA · Africa's reserve protocol · Confidential — for information only
